Andrew Stuart, Jeff Widderich : Crazy Str8ts: The Gr8 New Number Logic Puzzle before purchasing it in order to gage whether or not it would be worth my time, and all praised Crazy Str8ts: The Gr8 New Number Logic Puzzle:

1 of 1 people found the following review helpful. Great fun!!By Rebecca R. McKeeLike the first Crazy Str8ts book, this one is enjoyable and challenging. If you enjoy Sudoku, KenKen, or any similar number puzzles, this will delight you. I got hooked on it right away and found myself doing page after page without stopping.The first puzzle book had a spiral back which made it easier to hold and turn the pages. This one is a regular paperback-bound. I travel a lot for work and the spiral bound is much easier to use in a cramped airplane seat, but this one works fine for home or a desk.

Str8ts is a new type of brain bender that combines the basics of sudoku with a twist of sequential numbering. The digits 1-9 are still in play, appearing only once in each row and column, but now there are some black squares breaking up the action, and each consecutive group of white squares must contain numbers that make up a straight, in any order. This simple variation spices things up, so it's perfect for logic lovers looking for something unique.

About the Author Andrew Stuart grew up in Brentwood, near London, and is a frequent visitor to Canada and the US. Andrew has been making puzzles since 2005.
