By Kristine Courtial
When thinking about the success of our early nation, one must read this. The heroes of the early republic were not just on the battle field or the halls in government. Our brightest intellectuals set out to define who we are as a culture to distinguish us from our British cousins and create this thing called an American. Where other new world nations failed, we excelled. The failures of later revolutions to establish long lasting stable republics can be explained in the failure to clearly establish a culture of language, art and literature that is distinct from the European colonizer.

great source for materials for anyone who loves history, loves to read or is a history major in college. great insight into the early American government and somewhat public lives of the Revolutionary generation.

Amid the battle for American independence and the struggle to invent a federal government, American Revolutionary leaders and intellectuals sought also to create an American culture that would unify a territory of immense regional, ethnic, and religious diversity. In a sophisticated, yet accessible, interpretive narrative, Eve Kornfeld examines the efforts of Noah Webster, Benjamin Rush, George Washington, Judith Sargent Murray, David Ramsay, Mercy Otis Warren, and others to invent a national literature, narrate a story of nationhood, and educate a diverse people for virtuous republican citizenship. Among the 31 documents following the narrative are early attempts at American epic poetry, excerpts from the first narrative histories of the United States, and commentaries on the place of women and Indians in national life. Headnotes to the documents, reproductions of early paintings and portraits, a chronology, questions for consideration, a bibliography, and an index are also included.

"A most impressive narrative--in content, organization, and style. It presents complex ideas with great clarity and it analyzes text in language undergraduates can understand."
