Margie Golick : Deal Me in before purchasing it in order to gage whether or not it would be worth my time, and all praised Deal Me in:

4 of 4 people found the following review helpful. Fun skillsBy LindaI purchased this book probably in the '80's to help my homeschooled kids with math skill. It is one of the few books from that era still on my shelf. Now I have grands

that love card games but don't know very many or the rules to the ones they do attempt. Since I won't part with my copy, I purchased this from an outside seller and it will be a Christmas gift along with some packs of new cards. The book arrived in a timely fashion and is probably in better condition than my original. In these times of computers and video games, it is important to instill some of the skills that can be learned from a good ole game of cards with friends. Highly recommended - good explanations for kids and lots of variety.

In this refreshing and unique book, eminent child psychologist, Margie Golick, demonstrates how more than any other "educational tool" a deck of ordinary playing cards can be an invaluable teaching and learning resource. Deal Me In! lists more than 80 card games including popular favorites such as "Crazy Eights" and "Hearts." Golick describes the objectives and methods of play in simple terms and explains the specific skills taught by each game. Ideal for the parent or teacher in need of quick, effective and fun teaching games. Excellent for children with learning disabilities. Did you know that a simple game of "Go Fish" or "Old Maid" can teach your child concepts of space, time and number, principles of sorting and grouping, and the forethought, logic, planning ability and mental alertness needed to handle many intellectual tasks? A great learning tool.
