Richard Emmons : Diagramless Fill-Ins: Volume 2 before purchasing it in order to gage whether or not it would be worth my time, and all praised Diagramless Fill-Ins: Volume 2:

1 of 1 people found the following review helpful. Unique and Fun Puzzles By Terry S.I bought Volume 1 and Volume 2 of the diagramless fill-in books on a lark, looking for something different. What a pleasant surprise! I have found these puzzles to be just enough of a challenge to be fun. And they are addictive! As he did with his diagramless puzzle books, Mr. Emmons has added 15 more puzzles in Volume 2. These kinds of puzzles are very new and the tips he gives in the front of the book for solving them are really helpful. And just as he did in his diagramless puzzle books, he gives you two sets of hints if you need help. In the back of the book, he gives you the starting square for the first word. And he also gives you the first word if you need more help. The puzzles increase in size, starting out at 13 x 13 and going all the way up to 23 x 23 in the last few puzzles. I've looked but have not found this kind of puzzle anywhere else. These could be the next Sudoku.

these and just wish ...By Sheryl KI have gotten totally addicted to these and just wish there were more of them. Went through Volume 1 in a flash and now enjoying Volume 2.

This book is a cross between diagramless crossword puzzles and fill-in crossword puzzles. It is like a diagramless puzzle in that you have to figure out where the black squares are. It is like a fill-in in that you are given the answers, but you also have to determine where they go. Richard gives you all the Es to help you get started. The puzzle grids range in size from 13 by 13 all the way to 23 by 23. These new and different puzzles will challenge your spatial and logical reasoning while providing hours of puzzle-solving fun. With their lack of planned-word arrangement, they will engage puzzle solvers on a whole new level. Novice and expert puzzlers alike will enjoy Richards meticulously crafted new collection of diagramless fill-in puzzles.
