For example, I spent severals hours trying to do the "Orb Demolisher" feat in the Spiderman playset, yet the book doesn't mention that only the orbs from the "Right on Target" challenge count. That's a lot of

wasted effort that could have been avoided had they mentioned it in this book. For the record, I went through this book with a fine tooth comb looking for info on that feat and came up empty handed. I'm not saying the book isn't useful only that it doesn't include as much information as it should. When you buy a book like this, you are expecting walkthroughs for when you get stuck, etc. This book does not have that. Also, keep in mind that the information included is for ONLY the Marvel line and has next to no information about the Originals line, 1.0, etc. Only Marvel.0 of 0 people found the following review helpful. Fun game with great animation By Jerret Zwicker This was an ok manual at the discounted price. Fun game with great animation. Too bad they let this go so quick. Not very fair to the fans that invested into it. So much lost potential.0 of 0 people found the following review helpful. Great condition By Dustin Gibson I needed this for completing the Spider-man Playset. Very useful and detailed
