Bonnie Risby : Logic Safari Book 1 before purchasing it in order to gage whether or not it would be worth my time, and all praised Logic Safari Book 1:

3 of 3 people found the following review helpful. Really good logic puzzle book for 2-4th grade!By Laura LefevreAs a homeschool mom I want my kids to be able to use their logic and reasoning skills. I bought this book for my advanced 2nd grader, and boy is he challenged. This is the first time he has worked on logic puzzles. Each puzzle has a story and a grid to deduce the correct answers. I feel like this book is accomplishing exactly what I bought it for.0 of 0 people found the following review helpful. good beginning logic book for any ageBy GossamerAlthough this book states that it is for grades 2 to 3, it is a bit more difficult than that, and is a good starter book for almost any age for those unused to logic puzzles.0 of 0 people found the following review helpful. Exactly what I was looking for!By blueMy advanced first grader loved this book and blew through it excitedly. It was her first time doing logic puzzles and was a great intro. I highly recommend this book.

This safari will send students on an expedition that will result in hours of good thinking and unbridled enthusiasm. As enthusiasm soars, so do the levels of thinking skills engaged. Students love these deductive logic puzzles so much that they beg to do them, little realizing that they are building important reading comprehension and thinking skills. Teachers love these puzzles because of their ease of use in multicurricular parallels and their effortlessness in fitting into pullout programs of limited duration. Each motivating puzzle includes an introduction with student-related topics, clues, a grid, and illustrations. The goal in Logic Safari is to hunt down the clues, sort, analyze, and combine them into the correct solution. Each book represents an ever-increasing challenge to students while scenarios remain fresh, evoking renewed eagerness. The size of the grids is an indication of difficulty. This is the first book in a three-part series of deductive logic puzzles.

Prufrock Press puts out super logic resources! I've had the pleasure of using five of their logic/critical thinking books for elementary children and would recommend them to anyone . . . My kids LOVE these. We typically take one day a week during math time as a logic day. Puzzlers like these are some of the resources I'll use and they literally beg me for logic days . . . Black and white illustrations make the pages attractive to my children, while thorough, but uncomplicated explanations and clues are attractive to me. --Cindy West, The Curriculum Choice - December 14, 2009

About the Author Bonnie Lou Risby grew up in the Illinois woodlands atop the limestone bluffs across the Mississippi River from St. Louis. These woods were her playground where she and her siblings camped out, played detective, and enjoyed the beauty of the outdoors in every season. After attending college at Southern Illinois University Edwardsville, she taught school in Columbia, IL, for 13 years. She has taught elementary school, middle school, and high school, concentrating on the subjects of French, English, and gifted education. When Bonnie helped write the grant to establish Columbia's Gifted Program in the early 1970s, there were few materials readily available that fit well with a one-period per week pullout program. After the birth of her son, Bonnie retired from teaching and joined a family and marriage counseling practice for 12 years, continuing to write and create logic books in her spare moments. Retired from her therapy practice, Bonnie now works in a family business with her husband and son. Her office is in her home in Ballwin, MO, where Bonnie and her faithful pug dog, Francy, can be found most days. Bonnie has continued to write classroom books, chapter books, magazine articles, and books for young adults. Besides writing, Bonnie loves taking float trips down Ozark streams, biking, long walks with Francy, gardening, family history, and travel.
