Bonnie Risby : Logic Safari Book 3 before purchasing it in order to gage whether or not it would be worth my time, and all praised Logic Safari Book 3:

0 of 0 people found the following review helpful. it is a great logic book for those who have successfully completed the ...By Gossamer Although this book states that it is for grades five and six, it is a great logic book for those who have successfully completed the first two books and are at least grade 5 or 6, but the puzzles can challenge college students as well. 2 of 2 people found the following review helpful. Great logical problems By Toto We love it. My son has become more and more independent and sees himself making progress, and wants to do more, even when he spends 30 minutes finding the answer, he wants to do it all by himself. 0 of 0 people found the following review helpful. GREAT activities for kids! By It's Me CPI use all three of these books with various ages of gifted children (3rd, 4th, and 5th grade). Initially they are frustrated, but taking them through 1 or 2 puzzles together always does the trick. Now the kids ask me for these logic puzzles. They scour through the clues to fill in the charts. You can hear the

excitement in their voices and see it on their faces. This series was a score for my students!

This safari will send students on an expedition that will result in hours of good thinking and unbridled enthusiasm. As enthusiasm soars so do the levels of thinking skills engaged. Students love these deductive logic puzzles so much that they beg to do them, little realizing that they are building important reading comprehension and thinking skills. Teachers love these puzzles because of their ease of use in multicurricular parallels and their effortlessness in fitting into pullout programs of limited duration. Each motivating puzzle includes an introduction with student-related topics, clues, a grid, and illustrations. The goal in Logic Safari is to hunt down the clues, sort, analyze, and combine them into the correct solution. Each book represents an ever-increasing challenge to students while scenarios remain fresh, evoking renewed eagerness. The size of the grids is an indication of difficulty. This is the last in a three-book series of deductive logic puzzles.

Prufrock Press puts out super logic resources! I've had the pleasure of using five of their logic/critical thinking books for elementary children and would recommend them to anyone . . . My kids LOVE these. We typically take one day a week during math time as a logic day. Puzzlers like these are some of the resources I'll use and they literally beg me for logic days . . . Black and white illustrations make the pages attractive to my children, while thorough, but uncomplicated explanations and clues are attractive to me. --Cindy West, The Curriculum Choice - December 14, 2009

About the Author Bonnie Lou Risby grew up in the Illinois woodlands atop the limestone bluffs across the Mississippi River from St. Louis. These woods were her playground where she and her siblings camped out, played detective, and enjoyed the beauty of the outdoors in every season. After attending college at Southern Illinois University Edwardsville, she taught school in Columbia, IL, for 13 years. She has taught elementary school, middle school, and high school, concentrating on the subjects of French, English, and gifted education. When Bonnie helped write the grant to establish Columbia's Gifted Program in the early 1970s, there were few materials readily available that fit well with a one-period per week pullout program. After the birth of her son, Bonnie retired from teaching and joined a family and marriage counseling practice for 12 years, continuing to write and create logic books in her spare moments. Retired from her therapy practice, Bonnie now works in a family business with her husband and son. Her office is in her home in Ballwin, MO, where Bonnie and her faithful pug dog, Francy, can be found most days. Bonnie has continued to write classroom books, chapter books, magazine articles, and books for young adults. Besides writing, Bonnie loves taking float trips down Ozark streams, biking, long walks with Francy, gardening, family history, and travel.
