Michael Starks : Marijuana Chemistry: Genetics, Processing, Potency before purchasing it in order to gauge whether or not it would be worth my time, and all praised Marijuana Chemistry: Genetics, Processing, Potency:

2 of 2 people found the following review helpful. Great for its time By shawn badger Very informative but also very outdated. Its a good into to the subject to get an understanding but much more recent and new discoveries are easily at hand
3 of 3 people found the following review helpful. lots of information By L. LIVINGSTON this book is full of good information with many charts comparing different strains of marijuana. However, at least in my area of the country, it

may not apply as much as I'd like because a lot of selective breeding has happened here since this book was published. People in my area tend to grow outdoors so strains here are adapted to the local environment, which is very different than the conditions in an indoor environment

1 of 1 people found the following review helpful. Very interesting book about the history of cannabis, how ...By Nolan C. BabcockVery interesting book about the history of cannabis, how it is processed and the changes in the strains with the crossbreeding. Not light reading but very interesting.

Describes the psychoactive constituents of cannabis and the effects on potency of growth conditions, genetics, harvesting techniques, and processing. Includes variations in THC and CBD content, species differentiation, seeds, grafting, cloning, bonsai marijuana, growing techniques, extraction of THC, preparation of hashish and hash oil, smoking vs eating, testing for THC and CBD, as well as legal concerns. Illustrated.
