Tiny dots that turn into an amazing completed imageBy Amber M.I love dot-to-dot books, Marvel, and Thomas Pavitte, so I was ecstatic to see that he was coming out with a book that combined all of those things. I pre-ordered this one and I have not been disappointed. The numbers are definitely very small, but with a bright light, I haven't had much difficulty deciphering the numbers. I've included a couple images of the small dots to give you a better idea of their size. It's certainly something to consider, and if you struggle to see small images you may need to use a magnifying glass for this one. It does help that all of Thomas's dot-to-dot books

use a different ink color for each 100 numbers, so that makes it easier to find each number. Also, because each image has so many dots, you never have to draw very long lines. With other dot-to-dot books I often have to use a ruler because the lines can criss-cross across the entire page, but this book doesn't do that, so I haven't need to use a ruler at all to create clean straight lines. The numbers can get very close together, so be sure to use a fine-point pen or marker or you'll be drawing over your numbers a lot. I usually use between a 0.1mm- and 0.4mm size pigment liner. Sakura Pigma Micron's are my favorite for this book. I recommend tearing out each page before you begin working so you can lay it completely flat on a hard surface. I have several of the completed images hanging on my fridge and I get a lot of compliments about them. 1 of 1 people found the following review helpful. better than television and no where as noisy  
By Dan Potter until this book came out the only quibble i had with the series was the poster dot to dot. 1000 dots for two pages just does not look all that good. too spacey. exception the sydney opera house done looks darn good here problem solved. the poster has 1700 dots better result. i have bought this complete series. am now just finishing up on a couple books. hey thunder press send this pavitte back to work LOL i need more

By Joanna G. Awesome Dot-to-Dot. I ordered ones that were Star Wars and Disney Princesses from someone other than Thomas Pavitte and they were terrible. These are AMAZING. My Five year old son can't wait to have me hang them all around his room.

Your favorite Marvel superheroes are presented in 20 dot-to-dot puzzles that are amazing enough to display when you're finished! More sophisticated than the one-dimensional dot-to-dots you knew as a child, these puzzles take about 30 minutes to complete. Expressive line work builds as you join the dots, and each page is easily removed when you're finished. Who will be revealed next? Get your pencil ready to connect!

About the Author Thomas Pavitte is a graphic designer and experimental artist who often uses simple techniques to create highly complex pieces. He set an unofficial record for the most complex dot-to-dot drawing in 2011 with his version of the Mona Lisa in 6,239 dots. He lives and works in Melbourne, Australia.
