Kristy Fulton : Math Puzzles and Patterns for Kids, Grades 2-4 before purchasing it in order to gage whether or not it would be worth my time, and all praised Math Puzzles and Patterns for Kids, Grades 2-4:

1 of 1 people found the following review helpful. Two StarsBy CustomerWasn't worth the cost, not for a 4th grader, maybe 1st or 2nd grader.0 of 0 people found the following review helpful. I like that it covers the golden ratio and magic squares ...By HoustonMomI like that it covers the golden ratio and magic squares but the problems are a little too much work for my 3rd grader. I used this occasionally.9 of 10 people found the following review helpful. Fun and challenging!!By Kerry McreynoldsThis is a great book and is not a traditional math workbook. It is fun,interesting and educational. Awesome puzzles! This is really a neatbook for children who need additional challenges.

Move beyond the norm in your math classroom and challenge students to think critically with Math Patterns and Puzzles for Kids. Exploring the hottest concept in puzzle solving math logic puzzles Math Patterns and Puzzles for

Kids teaches students how to use reasoning to solve some of math's biggest conundrums: real-life patterns and puzzles such as Fibonacci's sequence, Sudoku puzzles, tangrams, Pascal's triangle, and magic squares. Students are taught the basic premises behind each challenging puzzle and are then asked to use the skills they have learned to solve multiple versions of each puzzle. Grades 2-4

About the Author Kristy Fulton has been teaching first grade for 14 years. She is also currently pursuing a master's degree in curriculum and instruction at the University of Texas at Arlington. She earned her B.A. in English from UT Permian Basin in 1992. Kristy has been recognized twice as a Model Educator by Renaissance Learning, and has received two Classroom Innovation grants from First Choice Power Company.
