In this path-breaking book, Rodger Streitmatter takes readers on a sightseeing tour of American history as influenced by the public press, visiting sixteen landmark events in US history, from the American Revolution and the civil rights movement to Watergate and 9/11. These are events that stir the political imagination; but, as Streitmatter shows, they also demonstrate how American journalism, since the 1760s, has not merely recorded this nation's history but has played a role in shaping it. This book is the first of its kind. Streitmatter avoids the mind-numbing lists of names, dates, and newspaper headlines that bog down the standard journalism history textbook. Instead, he focuses on a limited number of episodes, identifying common characteristics within the news media. The third edition includes an entirely new chapter on social media and the election of Barack Obama. This edition also looks beyond traditional journalistic outlets such as newspapers and television news reports to examine the modern-day role that the Internet and its various venues play in reporting the news and shaping history.

Praise for the Third Edition of Rodger Streitmatter's *Mightier than the Sword*When it comes to looking American journalism square in the eye and asking exactly the right questions, no book offers a fresher perspective and does it better than *Mightier Than the Sword*. Just for his examination alone of the media's failure over the years to support women's suffrage, or for questioning what is ethical in the pursuit of a cause as important as independence, Rodger Streitmatter deserves high grades for making his readers critically rethink their preconceived notions. Steve Klein, coordinator of the Journalism program at George Mason University"Streitmatter's book is an excellent auxiliary text for an introductory mass media class. It provides students with a real sense of the role the media have played in the development of American society and how they were used as agents of social change. It also provides a context for the role the media play today."Dave Cassady, Pacific University
