Boffo Fashion for the Future By A Customer This is an amazing book because, rather than offering pics we've all seen before, this book is fraught with new photographs taken expressly for it; and this is because the book shows fashion that is never-before-seen too. There are lots of books out now (and tv programs too) about fashion for the future, but if you want to see what the really top designers are planning (and clothes that are wearable, not weird), this is the best collection I've seen so far.

Leading designers, including Donna Karan, Issey Miyake, Manolo Blahnic, and others, offer their ideas for women's fashions of the future.
