On March 22, 1963 the album Please, Please Me was released and a phenomenon was sparked. Now, 50 years later,

The Beatles remain one of the most successful and recognizable groups on the planet. In this detail-filled book, musicologist Paul Charles looks at the years The Beatles were writing and recording music together. With an open, and certainly opinionated eye, he explores their music, their cronies, and their stories. This is rock 'n' roll chronology at its best, from an author who knows a thing or two about the music business.

From Booklist Who is Charles, author of the Christy Kennedy mystery series, to claim his book about the Beatles is the best ever? Well, it turns out that Charles, aside from being a crackerjack novelist, is a veteran music promoter, manager, and agent, having been in the business since he was a teenager. A Beatles fan since the four lads from Liverpool first started recording, Charles has written a personal appreciation book-length fan letter, almost of the group that changed the course of music history. (The title is, of course, tongue-in-cheek.) Rather than give us another history of the Beatles, Charles takes us through their music catalog, exploring the evolution of the Beatles by looking at the music they were making and the impact they were having on fans and fellow musicians. The book is full of nifty facts the band's first album, released 50 years ago, was recorded in a single 10-hour session but what makes it so enjoyable is the author's gung-ho, this-is-the-greatest-band-in-the-world approach. You can't read the book without getting caught up in his enthusiasm. --David Pitt "To share a fan's passion for the music...Single by single, album by album, Charles gushes." --Kirkus
