Over 500 puzzles I haven't seen before By Ed Pegg Jr I run a site called mathpuzzle, I have about a thousand puzzle books, and I follow a lot of puzzle sites. Often, when I get a puzzle book, I'm hoping to get at least a handful of puzzle types I haven't seen before. This book has hundreds of puzzles completely new to me. Every page is loaded with fantastic, colorful puzzles, and full answers for each puzzle are in the back. If I had to pick one puzzle book to recommend to anyone, it would be this one. This is the best puzzle book I've seen in the past 5 years. Some sample puzzles (but without the lovely graphics): #162: On a standard QWERTY keyboard, find 3 consecutive letters that make an acute triangle. #181: An 8 slice pizza was eaten by 4 people. No-one ate more than the other 3 combined, and everyone had a different number of slices. How many did each person eat? #384: A 24-hour clock shows the time 01:23, where the digits are in an increasing arithmetic progression. In this

case, they increasing with constant of 1. How many times in 24 hours will this property be seen? Highly recommended. 3 of 3 people found the following review helpful. One of the Best Puzzle Books Published. Ever! By C. Altay. Nearly all puzzle books out there are merely compilations of past works or overused classics. Rarely comes a collection of original puzzles that really "puzzles" at the same time. Well, this is it. Here is the Grabarchuk Family at their best: Original visual puzzles with beautiful graphics. And the book is executed exceptionally well. Solutions are detailed and equally beautiful, if not more so. At the back of the book, there are tiles, boards and pieces to be cut out for the 70 or so manipulative puzzles. 567 delightful puzzles at this price is simply too much. 6 out of 5 stars! 0 of 0 people found the following review helpful. Mixed bag of nice set of puzzles. Big, bold and colorful print on thick paper. By _shopper. Very colorful, big bold print on a large sheet of thick paper. And I'd say kid friendly!! Good variety of puzzles along with solutions, keeps you engaged. Even though the kids seem to like it more, I am biased towards the classic *The Moscow Puzzles: 359 Mathematical Recreations* (Dover Recreational Math).

Here's the next BIG thing in puzzles! This spectacular collection offers visual puzzles of every type, shape, and size—all in lavish color. Solvers can wrap their minds around cube puzzles, construction problems, puzzles with patterns, mazes, paper clip teasers, and more. These brilliant brainteasers are a challenge for the mind and a treat for the eyes.

About the Author. During many decades our family is working in the Puzzle World. We create various puzzles; make their designs and carefully test them; bring them to the market; compile and publish our puzzle creations in different books, magazines, newspapers, and on the Web; produce interactive puzzles; solve hundreds of puzzles a year; make puzzle researches and historical studies; and are involved into many other puzzle activities all over the World.
