Goodfellow If you are curious as to the cause, nature and origin of the critical state of disharmony on our planet, The Children of The Law of One The Lost Teachings of Atlantis by (the now late) Jon Peniel is the

most comprehensive, informative and authentically true book i've found on The Matter. With humor and aplomb the CLO LAT explained everything to me about "life" as we know and experience it in/on the extant (3D five sense reality) incarnated plane of existence we live/operate in/on. the CLO LAT also caused me see, literally and figuratively, The Light -- especially understanding, appreciating and coming to terms with the fact that we are indeed spiritual beings having a human experience (as opposed to human beings having a spiritual experience or even human beings having a human experience). If you want to know the origins of our being here, how things "devolved", why things are the way they are in our reality/world/plane of existence, how they got this way -- the details and history of how the whole "mess" started, who/what is responsible, what's gonna happen next/how the "mess" is going to be "cleaned" up, what needs to be done, how to better yourself and live life so as to be an exemplar for others, etc. -- essentially all of life's mysteries and questions explained -- then this is The Book for you. an excellent companion book imho, Fallen Angels and the Origins of Evil: Why Church Fathers Suppressed the Book of Enoch and Its Startling Revelations, is Most Congruent and dovetails very well with the CLO LAT teachings on what Went Wrong and what's gonna happen to Right Things. 0 of 0 people found the following review helpful. only to realize his story was woven into into an amazing autobiography. His story resonated with the knowing inside of me. I would highly recommend it! 0 of 0 people found the following review helpful. The Truth about Our Spiritual Lives By M. L. Redmond This book reveals that we are all one in spirit. It gives the history behind this truth being sabotaged and stopped from opposition. Sadly, those forces have stopped this truth about our history and continue to do so.

This is the account of an American teenager who discovered a monastery in Tibet that was the inspiration for the legend of "Shangri La". It might be categorized as a 'new age' or philosophy book, like The Celestine Prophecy, since it focuses on his spiritual training and their teachings in a novel-like format. Hard to believe, but interestingly, the sub-tropical region amongst the Himalayas that he describes finding, was later documented by explorers from National Geographic, the 'covered up' (there is still evidence of this). Also interesting is that the author was apparently mentioned in the Edgar Cayce readings (the famous American psychic whose books have sold millions of copies), as someone who would one day bring an important message to the world.
