From Library Journal Editor During (Foucault and Literature , Routledge, 1992) highlights major issues, trends, and hypotheses critical to scholars of contemporary culture since the 1950s, when cultural studies emerged as an academic discipline. The 27 essays by Theodor Adorno, Roland Barthes, Teresa de Lauretis, Michel Foucault, Michele Wallace, and Cornel West, among others, range from ethnicity, multiculturalism, and sexuality to theory and method. Comments and suggested readings accompany each essay, and a valuable introduction places the intellectual and political forces that have shaped cultural studies in their historical context. This volume will appeal to advanced students and scholars; recommended for libraries with in-depth collections in cultural studies and sociology.- Charles L. Lumpkins, Bloomsburg Univ. Lib. , Pa. Copyright 1993 Reed Business Information, Inc. Praise for the 3rd edition - 'a major collection of previously published work... It nevertheless continues to represent a collection of major work in and around the disciplinary intersections that the not-discipline of cultural studies likes to call home. Ultimately, this is one collection that's still worth having on your bookshelf.' - M/C- sAbout the Author Simon During is a Professor of English and Cultural Studies at Johns Hopkins University, USA.
