By BroncoBoy I seriously doubt that there's a better blackjack strategy book than this one. Why? Because Hornik breaks down the science behind the game of blackjack - removes

any illusions you may have about the game. But I will warn you that this book is for someone who's serious about learning how to succeed at blackjack - and by "serious" what I mean is that it does take some time and dedication to learn Hornik's system. So if you're looking to learn some quick tips before heading off to the casino, this may not be the book for you. If you're willing to spend some time learning the system be prepared to be impressed. Because the system is scientifically based, using statistical probabilities, I doubt there can be any book/system that is better than this because Hornik's system is irrefutable. If you're willing to dedicate the time to learn his system, you can expect to have some REAL chances for success at the blackjack tables. Enjoy good luck!

These are the smartest, simplest tactics for winning blackjack ever even a total novice can bet on it. Joshua Hornik belongs to a group of professionals who prove their talents at the table every day, and he knows that to come out on top, you have to count the cards. In this revised version of the popular guide to the game, Hornik explains blackjack's rules and basic strategy, how to do the actual card counting, and how to use the information the numbers reveal to make the right bets. Throughout, examples of hands illustrate the tactics, and an interview with a pro provides astounding insight.

About the Author Joshua Hornik is a former professional solo and team blackjack player. An MIT graduate, he was a member of the MIT Blackjack Team, playing and training with all the key people depicted in the bestselling book *Bringing Down the House* (which was the basis for the movie *21*).
