This edition is, essentially, a bad photocopy of the book--the print is annoyingly faint. Worse still, the text is full of under linings and various markings--those are all copied too. The only funny thing is that it appears that someone tried to cover the underlining with some sort of white out. The effect is comical, however, because they often blot out parts of the print above the underlining. This is a crappy edition.0 of 0 people found the following review helpful. Absolutely fantastic! What visionBy Brett TondreauThe Engineers and the Price SystemAbsolutely fantastic ! What vision,Veblen really nailed it Both Engineers and Technologists should familiarize themselves with this!0 of 0 people found the following review helpful. The original was also a wonderful tutorial on how to pad a term paperBy WiegertThis edition loses much of its readability because it is all run together as a cheap pamphlet. The original was also a wonderful tutorial on how to pad a term paper.

This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

About the Author Thorstein Veblen (1857-1929) was perhaps the most famous American economist and social critic of his time. He taught at the universities of Chicago and Missouri, Stanford University, and the New School for Social Research. His many books include *The Theory of Business Enterprise*, *The Higher Learning in America*, and *The Theory of the Leisure Class*, all available from Transaction.
